

Observed JJAS rainfall-anomaly composite

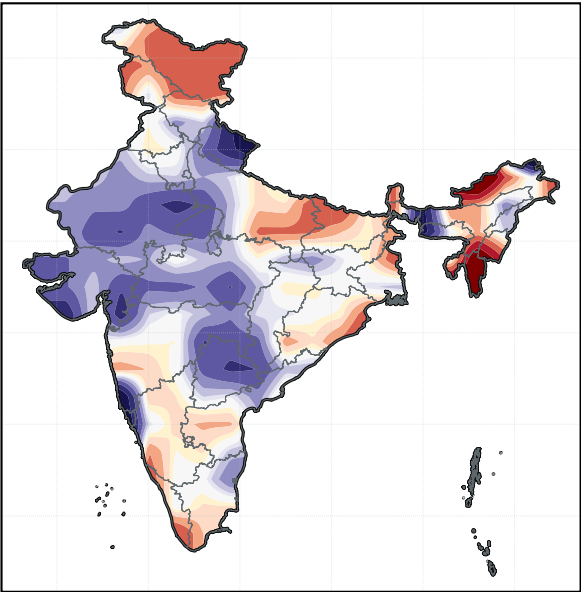

Arithmetic mean across 31 paired JJAS initialization cycles, 2023–2024

IMD weekly anomalies over the forecast-valid periods

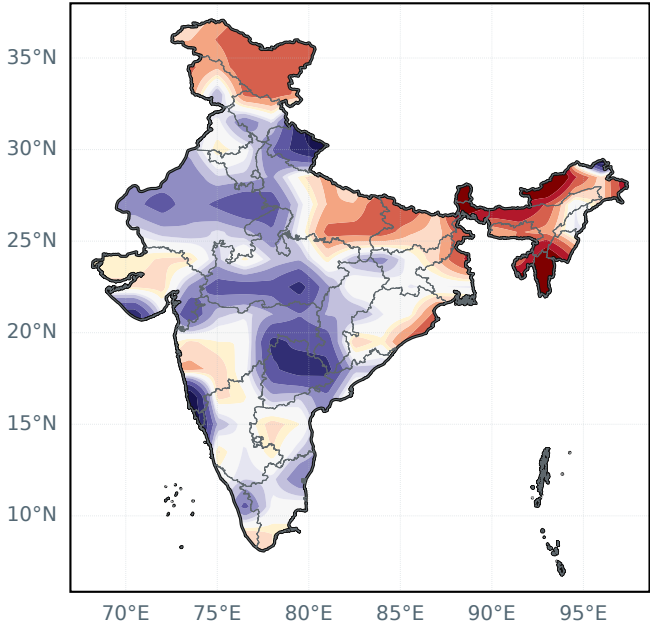

a Lead Week 1 (days 1-7)

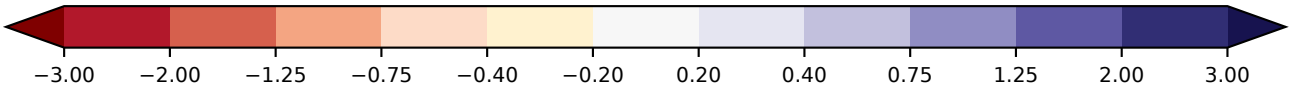

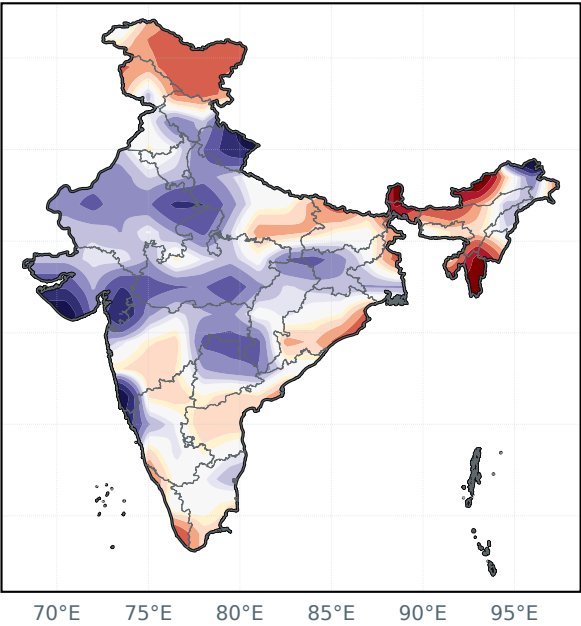

b Lead Week 2 (days 8-14)

c Lead Week 3 (days 15-21)

d Lead Week 4 (days 22-28)

Composite weekly rainfall anomaly (mm/day)

Common FuXi-native 1.5° grid; identical valid periods; full official India/state boundary including islands. Bilinear interpolation is used only for cleaner display; verification uses the unchanged native grid.
