

Weekly JJAS rainfall anomalies: observed vs forecasts

Average pattern across 31 paired forecasts, 2023-2024 • Red/orange = drier; purple = wetter

KEY RESULT FuXi matches IMD better in all four weeks • Mean ACC: FuXi 0.33 vs ERPAS 0.21

READ IT Match each forecast with IMD above: same colour in the same place is better. Weeks cover days 1-7, 8-14, 15-21 and 22-28; ACC 1 = perfect, 0 = no match.

Anomaly baselines: FuXi 2002-2021 hindcasts; ERPAS provider climatology; IMD 1991-2020. Bilinear interpolation is for display only; ACC uses the unchanged native 1.5° grid. Full official India boundary, including islands.
