

FuXi-S2S shows higher pattern skill and lower rainfall error

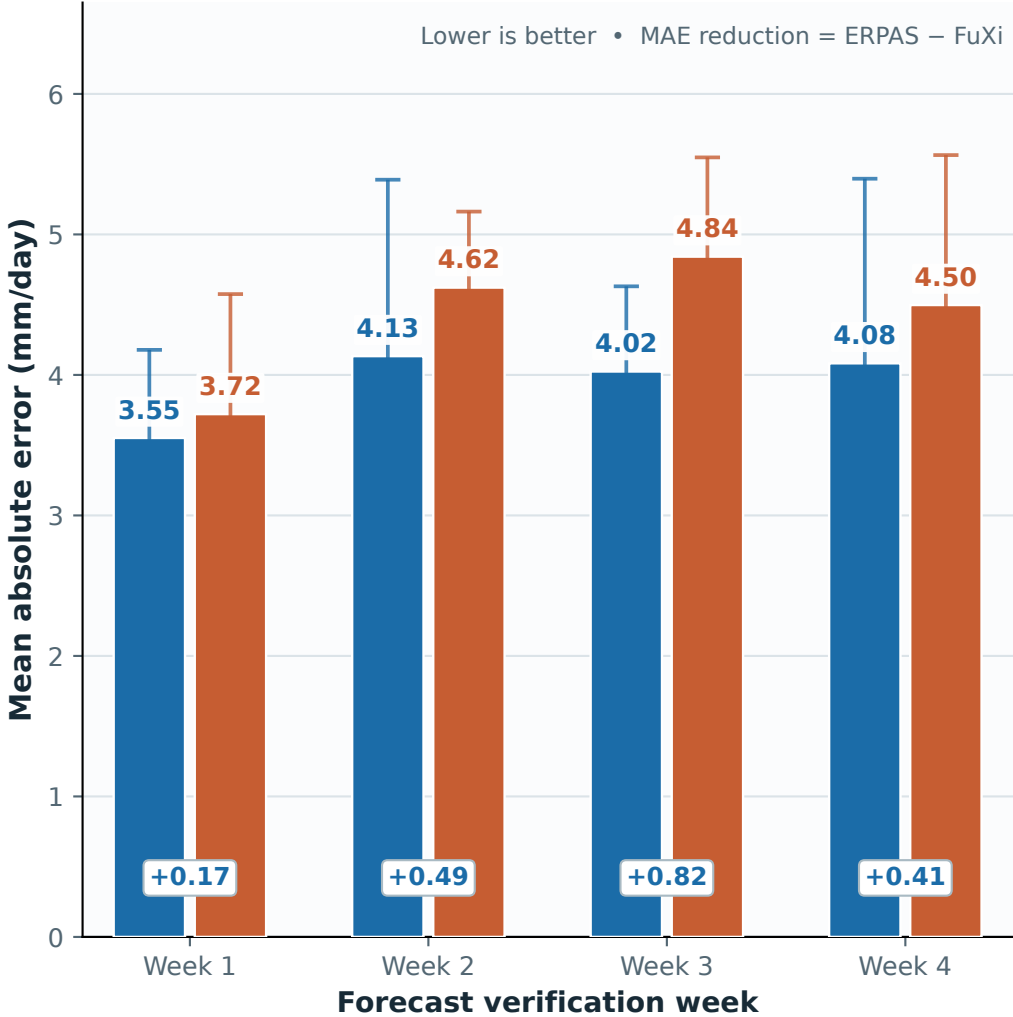

IMERG Final V07B verification • 31 paired JJAS starts, 2023-2024 • identical valid dates and common 1.5° India grid

FuXi-S2S ERPAS

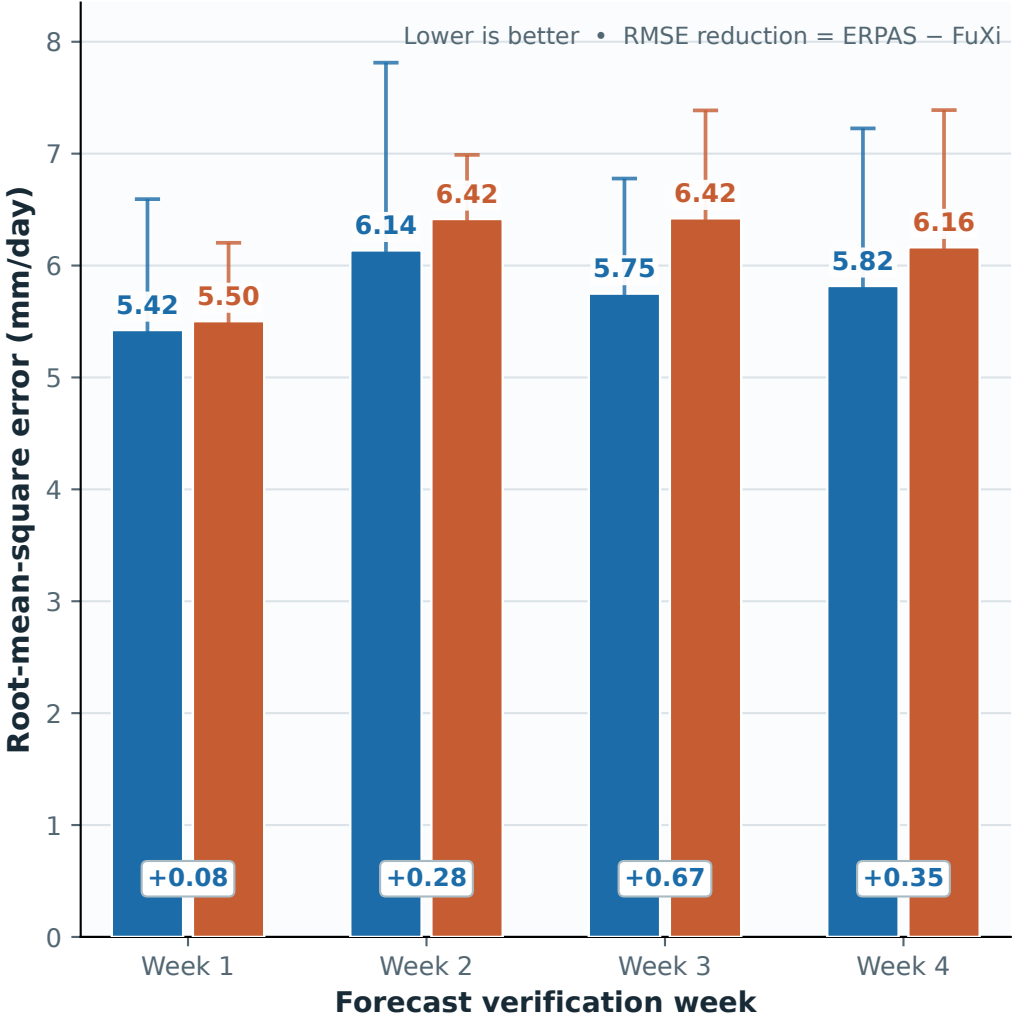

A ACC: anomaly-pattern skill

B MAE: rainfall-magnitude error

C RMSE: large-error sensitivity

Bars: arithmetic case mean • Whiskers: interquartile range • Area-weighted over fixed India support • Positive boxed values favor FuXi.
ACC climatologies: FuXi native 2002-2021 lead/init; ERPAS provider reforecast; IMERG 2001-2022. MAE and RMSE use raw weekly rainfall; RMSE emphasizes large errors.
