

Rainfall anomaly-pattern skill

FuXi-S2S vs ERPAS • 31 paired JJAS starts across 2023–2024 • same valid dates and 1.5° India grid

Higher is better. Boxed Δ = FuXi–ERPAS ACC; positive favors FuXi. Bars: arithmetic mean across 31 paired initializations. Whiskers: interquartile case range. Same 1.5° India grid and area weights. FuXi uses native 2002–2021 climatology; ERPAS uses provider climatology; IMD 1991–2020; IMERG 2001–2022.
