

Season changes the FuXi-ERPAS rainfall-skill ranking

101 paired starts across 2023-2024 • four disjoint issue-month seasons • common IMD 1991-2020 anomaly baseline • same 1.5° India support

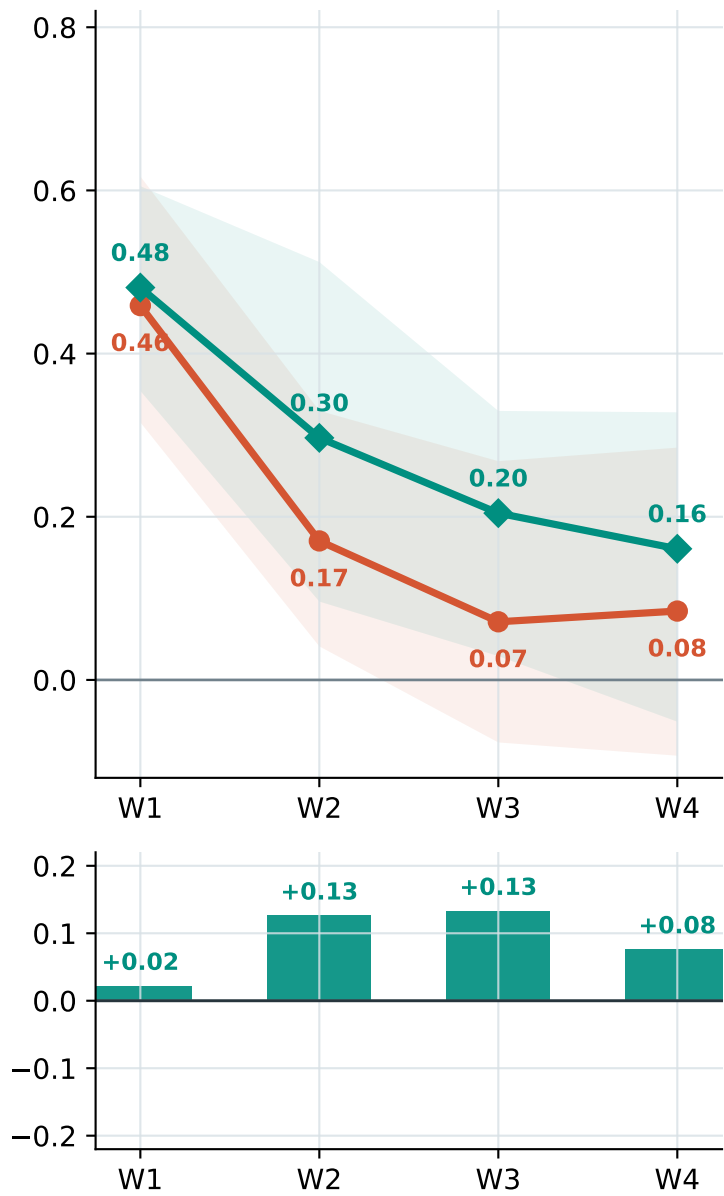

JF • n=17
Mixed ranking: FuXi leads 2/4 weeks

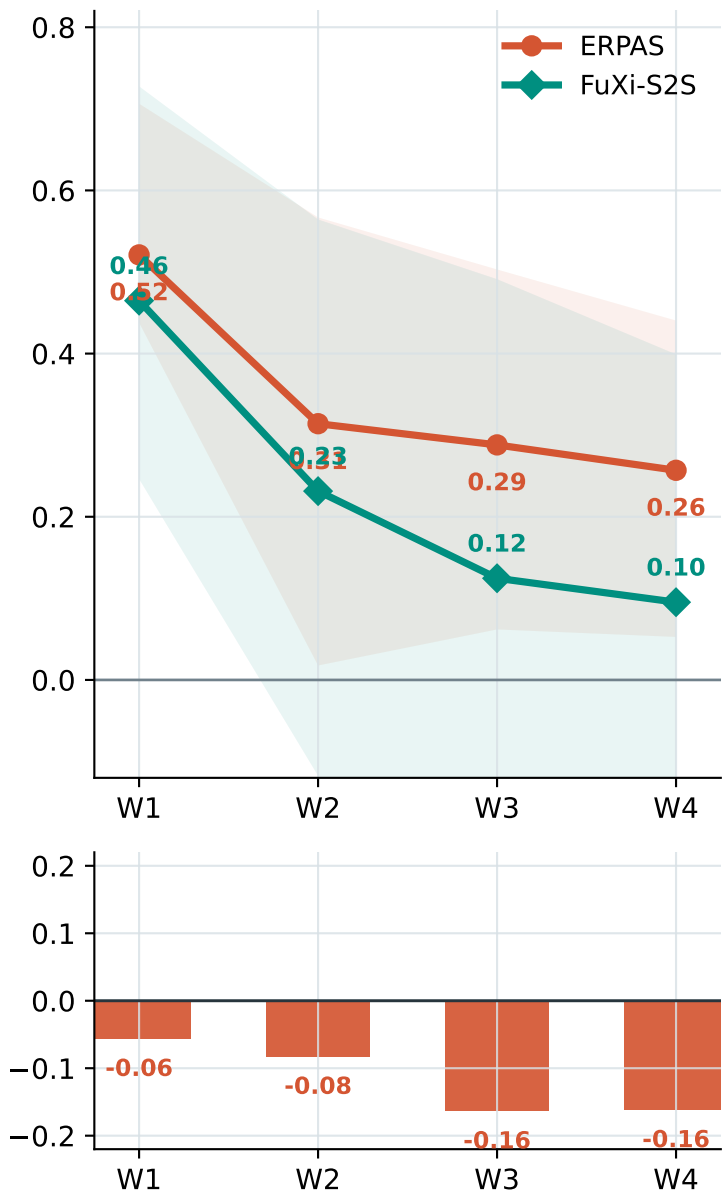

MAM • n=27
FuXi higher at all four weeks

JJAS • n=31
FuXi higher at all four weeks

OND • n=26
ERPAS higher at all four weeks

Primary statistic follows paper_v2: arithmetic mean of per-initialization area-weighted spatial ACC. Shading is the interquartile case range (descriptive). Seasons use ERPAS issue month: JF, MAM, JJAS and OND. The separate JFM paper_v2 window remains available in the CSV.
